VIVAX METROTECH

vCam
Mobile Controller App

VMC vCam Mobile Controller

- **Update the devices firmware**
- **Record in HD on the tablet or smartphone**
- **An instant second screen at job site**
- **Instantly share pictures or video**
- **Add audio and text comments**

The vCam Mobile Controller (VMC) connects a tablet or smartphone to the vCam-6 or vCamMX-2 controller via Wi-Fi and streams the live video into the app. The videos and pictures captured in the app can be shared using the tablet's native sharing options.

What is seen on the control modules LCD is duplicated in the vCam Mobile Controllers app screen. This allows the contractor to keep everyone off the job site while still allowing them to view the live inspection.

Download the free vCam Mobile Controller app from the Apple or Google Play stores. Visit our website, and under the Apps section, you will find links to both stores and a quick guide for operating the app.

Download on the **App Store**

GET IT ON **Google Play**

VMC vCam Mobile Controller

Easily update the systems firmware
